About the Data

This publication provides a data source for Alberta's international trade, and is intended to provide businesses with information on current export markets.

A profile is included for each country that imported over $5 million worth of Alberta's goods in 1999. Each profile lists the top 15 commodities Alberta exported to that country and also compares them with Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Statistics Canada's regional groups are used. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see Appendix A).

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, some commodity descriptions accompanying these codes have been revised from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

With the exception of non-tourism service exports, Statistics Canada is the main source of information for the publication. Estimates for non-tourism ("other") exports are based on the *Alberta Service Exports Survey - 1996*. The informational captions appearing at the top right corner of each country profile are from *World Factbook 1999*. The term "nes" refers to "not elsewhere specified."

The term "exports" refers to "domestic exports," goods grown, extracted or manufactured in Canada. The term includes goods of foreign origin which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, total service exports, including tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

International Market Profiles

Alberta Economic Development has developed a website, which contains a series of international market profiles intended to help Alberta businesses identify international market opportunities.

Profiles have been prepared for over 50 countries and regions, and are updated quarterly. Each profile offers an in-depth look at a country or region covering critical information on its trade and investment environment, financing availability, Alberta's current exports, and sector-specific opportunities for Alberta businesses.

The webpage can be accessed at: **www.alberta-canada/markets**

The Year in Review

Alberta exported $38.1 billion worth of goods and services to more than 150 countries in 1999. This total includes $34.5 billion in commodity exports and $3.6 billion in service exports. Exports of goods and services increased by 11.1% in 1999, from 1998's value of $34.3 billion.

Commodity Exports

The value of commodity exports increased strongly by 11.4% from 1998 to a value of $34.5 billion in 1999. Of the 158 countries Alberta exported to, the top markets were the United States, Japan and China. The United States imported $29.2 billion worth of goods, Japan $1.3 billion and China $543 million.

The main causes for the rise in Alberta's exports were higher commodity prices, for instance for crude oil, natural gas and lumber, increased volumes of natural gas, beef, telecommunication equipment and other commodities exported, and a very strong U.S. market.

Regionally, Alberta's major markets were the United States, Asia and Western Europe. The United States accounted for 84.5% of total commodity exports, Asia 8.8% and Western Europe 2.8%. While exports to the United States increased by 15.4% to $29.2 billion, those to most other regions declined. Exports to Asia fell by 1.5% to $3.0 billion, and those to Western Europe by 10.0% to $1.0 billion.

Commodity exports can be classified into three sectors: mining, primary agriculture, and manufacturing. The mining sector accounted for the majority of exports at $18.7 billion, followed by the manufacturing sector at $12.7 billion and primary agriculture at $2.4 billion. Increases occurred in the mining (16.5%) and manufacturing (11.8%) sectors, while a decrease occurred in primary agricultural exports (18.7%).

Service Exports

Service exports were estimated at $3.6 billion in 1999, an increase of 8.0% over 1998. Included in this figure are $1.3 billion in international tourism receipts and $2.3 billion in exports of other services.

Unlike commodity exports, services cannot be included on a country specific basis. Therefore, unless otherwise specified, the term "export" in the remainder of this publication will refer strictly to commodities.

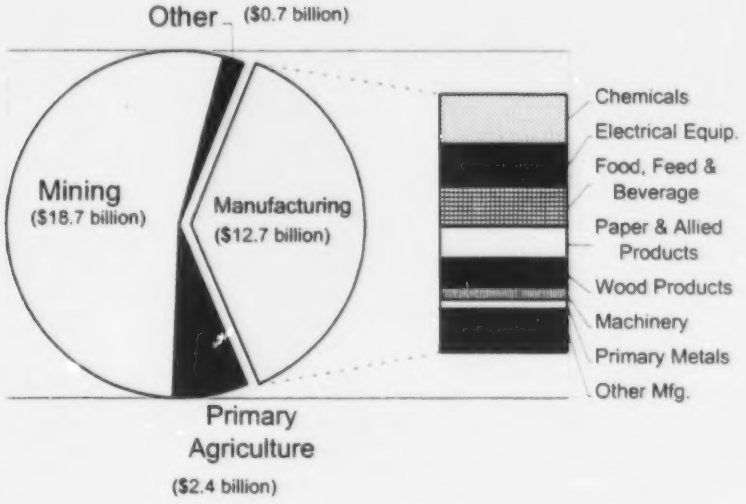
Market Influences

Some of the factors that influenced Alberta's 1999 trade include:

- higher commodity prices, e.g. for crude oil, natural gas, beef, lumber, oriented strand board and refined petroleum products
- low grain and oilseed prices
- strong US and Japanese currencies relative to the Canadian dollar
- weaker European currencies
- the strong U.S. economy
- slower growth in Europe
- economic recovery in most Asian countries
- continued weakness in Japan
- economic downturn in South America
- trend towards more local processing of Alberta beef cattle in the province
- economic and political instability in Eastern Europe

Alberta Exports by Industry and Commodity

The value of Alberta's commodity exports in 1999 was $34.5 billion, an increase of 11.4% over 1998. The increase is due primarily to stronger commodity prices and increased export volumes of manufactured goods and natural gas, especially to the U.S.



Alberta's exports are divided into three main sectors: mining, manufacturing and primary agriculture. The mining sector accounted for $18.7 billion (54.2%) of Alberta's commodity exports. This consisted primarily of natural gas and crude petroleum at $9.7 billion and $7.7 billion, respectively. Compared to 1998, mining exports were 16.5% higher than in 1998, primarily a result of higher prices.

The manufacturing sector accounted for $12.7 billion in exports, an increase of 11.8% over 1998. With the exception of primary metals and machinery, which were affected by a weak crude oil sector, each of the major sub-sectors increased in value. Strong performances were recorded in electrical/electronics equipment exports (up 28%) and in wood products (up 29%).

Primary agricultural exports totaled $2.4 billion in 1999, a decline of 18.7%. Major factors for this decrease were lower exports of live cattle (down 33.0%), wheat (down 13.7%), durum wheat (down 13.0%), canola (down 22.1%) and barley (down 12.6%). Lower grain exports were mostly the result of less Canadian grain being available for export, while oilseed exports were down because of lower prices. Cattle exports were lower as a result of increased slaughtering activity in Alberta, which also led to increased beef exports.

1 Estimate.

Agriculture, Food and Beverages

The combined export value of primary agriculture, and food and beverages (agri-foods) totaled $4.4 billion in 1999. While primary agricultural exports decreased by 18.7% to $2.4 billion, exports of food and beverages increased by 13.2% to $2.0 billion. The leading agri-food exports were beef products at $1.2 billion, wheat at $930.1 million, and cattle at $466.8 million.

The increase in beef exports was a result of greater demand from the United States, and the increased slaughtering capacity in Alberta. The value of these exports increased by 30.0%, from $942.7 million to $1.2 billion. Pork exports rose by 23.5% to $108.2 million. Exports of prepared and preserved potatoes, mostly frozen french fries to the U.S., rose five-fold to $71.4 million.

The value of wheat and durum wheat exports declined by 13.6%, compared to 1998. Durum wheat prices dropped by 21%, and volumes of wheat exported to a number of key markets, such as Indonesia, China and Brazil, were down sharply. Wheat exports to Iran were up significantly, from $58.2 million to $96.4 million, making that country the top importer of Alberta wheat.

Live cattle exports declined by 33.0%, as the number of beef cattle shipped to the U.S. fell as a result of the shift in Alberta towards more local processing. Exports of canola and canola products also fell because of lower canola prices and a large reduction in canola oil shipments to Asia.

Almost 60% of agri-food exports went to the United States ($2.6 billion), mostly in the form of beef products ($1.1 billion) and cattle ($466.1 million). Other major agri-food markets were Japan, China and Mexico at $544.0 million, $173.6 million and $162.2 million, respectively.

Mining

Mining exports in 1999 were valued at $18.7 billion compared to $16.1 billion the year before. A major factor behind this 16.5% increase was a $1.8 billion increase in the value of natural gas and a $1.0 billion increase in crude oil exports.

The 22.3% increase in the value of gas exports occurred as a result of a combination of higher prices (up 15%) and higher volumes shipped (up 7%). The 15.1% increase in the value of crude oil exports occurred despite a 7% decline in the volumes that were shipped. Crude oil prices rose 23%. Petroleum gas exports fell as a result of lower volumes imported by the United States.

Exports of coal were up by 8.8%, even though prices were 20% lower. The major coal markets were Japan ($288.9 million) and South Korea ($131.2 million).

The majority of Alberta's mining exports went to the United States, consisting mostly of crude petroleum, natural gas and propane. Approximately 96% was imported by the United States, while the rest was imported primarily by Japan and South Korea.

Manufacturing

Manufactured exports increased by 11.8% to $12.7 billion, representing 37% of all commodity exports. Higher volumes accounted for more than 90% of the $1.3 billion increase in the value of manufactured exports. Export volumes increased for most of Alberta's major exports, such as telecommunication transmission equipment, boneless beef, lumber, polyethylene, refined petroleum and oriented strand board (o.s.b.). Although prices for a number of commodities such as cobalt, newsprint paper, artificial filament tow (for cigarette filters) and canola oil declined, other commodities such as beef, lumber, o.s.b. and refined petroleum saw higher prices. Since 1994, manufactured exports have almost doubled, from a value of $6.6 billion.

Of the 14 sub-sectors that comprise this sector all but four of the smallest sub-sectors increased in value compared to 1998. Significant gains occurred in transportation equipment (up 67.9%), construction products (37.0%), wood products (29.2%), electrical and electronic products (28.2%), refined petroleum and coal products (26.9%) and plastics (25.1%).

Chemicals and chemical products remained Alberta's largest sub-sector, increasing 7.2% to $2.6 billion. Other major sub-sectors were electrical and electronic products ($2.1 billion), food, feed and beverages ($2.0 billion), paper and allied products ($1.6 billion) and wood products ($1.4 billion).

The major manufactured commodity exports in 1999 were wood pulp, beef products, telecommunication transmission apparatus and lumber. Collectively, these accounted for more than one-third of all manufactured products.

Commodities contributing to the overall growth of manufactured exports were: beef products (up $282 million, or 30%), transmission apparatus (up $281 million, or 34%), lumber (up $166 million, or 25%), telephone systems and apparatus (up $146 million, or 45%), oriented strand board (up $115 million, or 33%), and wood pulp (up $111 million, or 9%). With the exception of wood pulp, most of these commodities were exported primarily to the United States. For wood pulp, primary markets also included Japan and South Korea.

TOTAL ALL MANUFACTURING	**11,407,533**	**12,748,349**	**11.8%**

A total of $9.2 billion of manufactured commodities was imported by the United States, an increase of $1.2 billion or 15.5% from 1998, mainly because of much higher exports of telephone equipment and beef. The U.S.' largest three manufacturing sectors in 1999 were: chemicals and chemical products ($1.9 billion), electrical and electronic equipment ($1.8 billion), and food, feed and beverages ($1.4 billion). Between 1995 and 1999, the value of exports of electrical and electronic equipment to the U.S. rose by 149%.

Other major markets were from Asia: Japan ($624.6 million), South Korea ($349.3 million), China ($306.7 million), and Taiwan ($195.7 million). Manufacturing exports to Japan were down 2%, as a result of large declines in canola oil and malt. Paper and paper products, and food, feed and beverages were Alberta's largest manufacturing export sectors. Exports to China increased 38%, mostly because of a 31% increase in exports of chemicals and chemical products, which account for two-third of China's manufactured imports. A tripling of exports of telephone equipment was the main cause of the 16% rise in exports to Taiwan. South Korean imports of manufactured goods from Alberta were 14% higher in 1999 than in the previous year, as a very large increase in wood pulp imports more than made up for the virtual disappearance of canola oil imports.

Alberta's largest European markets for manufactured goods were: Italy ($141.3 million), Germany ($123.4 million), the Netherlands ($122.2 million), and the United Kingdom ($102.0 million). For Italy and the Netherlands the largest manufacturing import was nickel, for Germany wood pulp, and for the U.K. telephone equipment.

Forestry, including Wood, Paper and Allied Products

Overall, forestry products totaled $3.0 billion in 1999, an increase of 17.5% over 1998. Major gains came from lumber, oriented strand board and wood pulp. For all three commodities a combination of higher prices and increased volumes led to the increases in value. The value of newsprint exports declined because of lower prices.

The primary markets for wood pulp were the United States ($533.4 million), Japan ($233.7 million) and South Korea ($169.0 million). Pulp exports to the U.S. and Japan increased moderately by 1.4% and 7.8% respectively, but Korean pulp imports jumped by more than 50%. O.s.b. was primarily imported by the United States, accounting for more than 90% of the total.

The value of lumber exports increased by 25.0% in 1999, as a result of a 25.2% increase in lumber exports to the U.S., which accounts for over 90% of Alberta lumber exports. Lumber exports to Japan also increased strongly.

Major markets for forestry products were the United States ($2.1 billion), Japan ($330.6 million), South Korea ($175.7 million) and Germany ($70.7 million).

Chemicals and Chemical Products

The value of chemicals and chemical product exports increased by 7.2% to $2.6 billion, as a result of increases in the volumes exported of such commodities as polyethylene, acyclic ethers, ethylene glycol and styrene.

Polyethylene, Alberta's largest chemical export, benefited from both higher prices and increased demand. The overall effect was a 16% increase compared to 1998. The value of polyethylene exports to the United States rose 20% from $268.7 million to $321.2 million as a result of higher prices (up 5%) and higher demand (up 14%). Exports to China and Belgium also rose strongly.

Exports of urea fell by 1% to $325.5 million, as volumes to the U.S. fell by almost 4%. In 1999, the U.S. accounted for 97% of Alberta's urea exports. Exports of acyclic ethers increased by 11.6% to $316.3 million, as volumes increased by almost 11%. Exports of ethylene glycol, styrene and anhydrous ammonia increased by more than 15%, because of increased demand. Taiwan, China and the U.S. are the largest markets for ethylene glycol, the U.S., South Korea and Taiwan for styrene, while the U.S. is the only market for acyclic ethers and anhydrous ammonia.

Major markets for chemicals and chemical products were the United States ($1.9 billion), China ($206.1 million), Taiwan ($109.4 million) and South Korea ($104.7 million).

Machinery

After strong growth during the previous four years, exports of machinery products declined significantly in 1999. In that year they were 29.6% lower than in 1998 at $614.5 million, as a result of steep declines in most major markets. Exports to the U.S. fell by 26.4% to $395.6 million, mainly because exports of drilling machinery and compressors to Alaska dropped from $130 million in 1998 to less than $4 million in 1999. In 1999, exports to Poland, Kuwait, Iran and Cuba were only a fraction of what they were in 1998.

* Note: All commodity groups include parts exports

While the United States accounted 64% of machinery exports, other major markets included Argentina at $16.7 million and Russia at $16.2 million, and the United Kingdom, Singapore, South Korea and Venezuela (each importing more than $10 million).

Electrical and Electronic Equipment

Since 1994, Alberta's exports of electrical and electronic equipment have grown by a total of 227%. This sector accounted for $2.1 billion of commodity exports, an increase of 28.2% over last year's level of $1.6 billion. Telecommunications related products made up the majority of these exports, in particular, transmission apparatus and its parts ($1.3 billion) and telephone systems and apparatus ($472 million).

The United States accounted for $1.8 billion or 89% of Alberta's electrical and electronic equipment exports, the U.K. for $39.5 million, Australia for $31.1 million, Taiwan for $24.4 million, and Mexico for $21.0 million.

Primary Metal Products

Primary metal exports consist mainly of cobalt and nickel. Overall, the sector decreased in value by 11.5%. This was attributed primarily to a 30% drop in cobalt prices. As a result, cobalt exports fell by 30.7% to $147.8 million. Exports of unwrought nickel rose 10%, even though volumes were down, because prices increased by almost 30%.

The major markets for primary metal products were the United States with $106.1 million (mostly aluminum and nickel), the Netherlands at $103.1 million (cobalt and nickel), Italy with $65.8 million and Japan with $58.0 million.

Refined Petroleum & Coal Products

Exports of refined petroleum and coal products were valued at $416.3 million, an increase of 26.9% over 1998. Most of this increase was the result of higher volumes, especially for petroleum oils, although prices were also stronger.

This sector consists primarily of petroleum oils (such as diesel fuel and fuel oil), which accounted for 78% of the total. The United States accounted for 98.5% of all refined petroleum and coal product exports.

Transportation Equipment

Transportation exports in 1999 were valued at $377.6 million, an increase of 67.9% over 1998. Much of this increase was a result of higher exports of turbo-jets and turbo-propellers (up $84.8 million). Sales of trucks, special purpose vehicles, railway cars and automobiles also rose strongly.

The major market in 1999 was the United States with $340.0 million in imports, compared to $209.3 million in 1998, an increase of 62%. Most of the imports were turbo-propellers, trucks, springs and parts for special purpose vehicles.

Other significant markets included China ($9.4 million) and New Zealand ($5.1 million). Imports by these two counties consisted mainly of turbo-propellers and helicopters, respectively.

Alberta Exports by Region and Country

The United States is Alberta's largest export market, accounting for 84.5% of international exports, up from its 1998 market share of 81.6%. Exports to the United States jumped 15.4%, from $25.3 billion in 1998 to $29.2 billion the following year. Although the growth was largely the result of major increases in exports of oil and gas, each of the other top exports to the U.S. also rose in value and contributed to the overall growth in the U.S. market.

Canadian exports to the U.S. rose 14.2% up to $286.8 billion in 1999. Continued growth in automotive exports was the major force in the upsurge yet big gains in exports of oil and gas also made a significant impact. The U.S. accounted for 86.8% of Canada's 1999 exports.

If exports to the U.S. are excluded, Alberta's total exports declined by 6.3% between 1998 and 1999, mainly as a result of large decreases in canola, canola oil, wheat and machinery exports. Canadian non-U.S. exports were 5.8% lower in 1999 than in 1998.

Most of Alberta's major non-U.S. markets, such as Japan, Mexico and the United Kingdom, imported less from Alberta in 1999 than the year before. Other major markets like China, South Korea and Taiwan increased their imports from Alberta.

- **Japan** was Alberta's second largest export market, accounting for 3.7% of Alberta exports. The value of goods exported to Japan decreased by 4.7% to $1.3 billion in 1999.

- With Alberta imports of just under $543 million, **China** was Alberta's third largest market. This was 12.6% more than the $482.1 million China imported in 1998.

- Exports to **South Korea**, Alberta's fourth largest market in 1999, were up 12.4%, from $445.3 million in 1998 to $500.5 million in 1999.

- Despite a 18.6% decrease in imports from Alberta, **Mexico** sustained its position as Alberta's fifth largest market in 1999. Mexico's imports from Alberta dropped to $233.3 million.

- **Taiwan** moved up to become Alberta's sixth largest market. The value of exports to Taiwan grew from $210.3 million in 1998 to $232.6 million in 1999, a 10.6% increase.

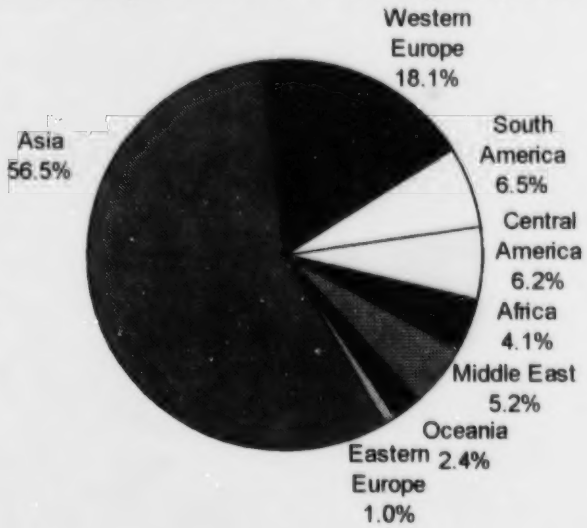
- Exports to the **United Kingdom** slipped 22.9% from $230.1 million in 1998 to $177.8 million in 1999.

- **Italian** imports of Alberta goods fell 5.7% from $172.9 million in 1998 to $163.0 million the following year.

- **Germany** was Alberta's ninth largest export market, even though the value of Alberta's exports declined by 15.4%, to $138.5 million in 1999.

- Exports to the **Netherlands** also decreased, by 17.1% from $163.5 million in 1998 to $135.4 million in 1999.

Alberta Exports to Non - U.S. Regions, 1999



Total Value of Exports $5.3 Billion

- ***Asia*** reduced its imports of Alberta goods by 1.5%, from $3.1 billion in 1998 to $3.0 billion in 1999. Asia accounted for 8.8% of Alberta's international commodity exports.

- Exports to ***Western Europe*** decreased by 10.0% between 1998 and 1999, to $966.6 million.

- ***South American*** imports from Alberta fell 1.7% from $355 million in 1998 to $348.9 million in 1999. However, South America moved up one position to become the fourth largest regional market.

- The ***Central American*** region, which includes Mexico and the Caribbean, experienced a 20.2% decrease in imports from Alberta and slid to become the fifth largest export region for Alberta goods. Central America dropped from $415.8 million in 1998 to $332 million in 1999.

- Exports to the ***Middle East*** fell by 9.4%, from $305 million in 1998 to $276.3 million in 1999. The Middle East was Alberta's sixth largest market.

- Alberta's exports to ***Africa*** dropped 23.8% from $285.4 million to $217.6 million. Africa was Alberta's seventh largest regional market.

- At $129.3 million, exports to ***Oceania*** were 12.6% higher in 1999 than in 1998. Oceania was the only region, with the exception of the U.S., to increase Alberta imports in 1999.

- Exports to ***Eastern European*** markets fell sharply by 38.9%, to $54.8 million as the region remained the smallest market for Alberta exports.

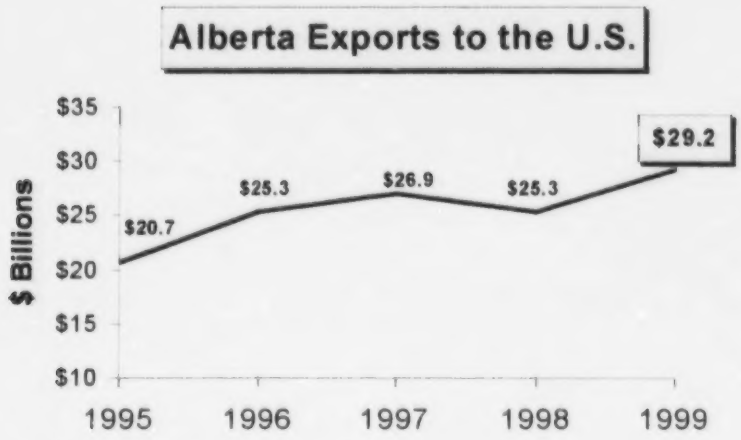
United States of America

Alberta's exports to the United States rose by 15.4% in 1999 and have grown by 41.1% since 1995. U.S imports of Canadian goods rose 14.2% in 1999 and 47.5% over a five year period. Total Alberta exports in 1999 were worth $29.2 billion and accounted for 10.2% of the $286.8 billion exported to the U.S. from Canada.



- Each of the top six exports to the United States increased significantly in 1999 by at least 15%.
- Major gains in exports of oil and gas were the most substantial and had the biggest impact on the upsurge of total export value to the United States.
- Alberta accounted for 88.1% of Canada's natural gas exports to the United States, and 76.0% of Canada's crude oil exports.

Alberta exported $1.8 billion more natural gas and $1.0 billion more crude oil in 1999. Natural gas and crude oil grew by 22.3% and 15.4% respectively, and the two exports collectively accounted for 59.8% of the total value of exports to the U.S. Natural gas was Alberta's largest export, growing from $7.9 billion in 1998 to $9.7 billion in 1999. Exports of natural gas increased mostly due to higher prices and a slight rise in volume. Crude oil exports grew from $6.7 billion in 1998 to $7.7 billion in 1999 and remained the second largest commodity. A 6.2% volume decline was more than offset by a 23.1% rise in the price of crude oil exports.

The other top commodities that had strong growth in exports to the United States include:

- ✓ transmission apparatus for radio-telephony, up 32.3% to $1.1 billion
- ✓ boneless bovine cuts, up 43.4% to $765.8 million
- ✓ softwood lumber, up 25.5% to $748.5 million
- ✓ oriented strand board, up 34.5% to $435.3 million
- ✓ petroleum oils (other than crude, e.g. diesel fuel/heating oil), up 39.3% to $321.0 million
- ✓ turbo propellers, up from $2.5 million in 1998 to $80.2 million in 1999
- ✓ prepared potatoes, up from $3.6 million to $61.8 million

The rise in oriented strand board and lumber exports were the result of higher prices. Although prices rose for each of the other exports, their values increased mostly as a result of higher volumes shipped.

The biggest loss in export value in 1999 was a 33.1% drop in live cattle, from $696.3 million in 1998 to $466.0 million in 1998, as more cattle were processed within the province. Exports of liquefied propane dropped 37.8% despite a 33.5% rise in the price of this export. Other liquefied petroleum gases decreased 39.7% to $109.9 million. A decline in the volume of each of these exports caused the losses.

Asia

Asia remained Alberta's second largest regional market in 1999. Three of the top five international export markets for 1999 are part of the Asia region. Alberta exports to Asia came to $3.0 billion in 1999, a 1.5% decrease from $3.1 billion exported in 1998.

Asia represented 8.8% of the total goods Alberta exported internationally in 1999. Since 1995, the value of exports to Asia has fallen by 23.6%

A 4.7% drop in the export value to Japan was the major cause of the 1999 decline in Asia. Price decreases in both canola and canola oil also contributed to the drop in the overall value of Alberta exports to Asia. Most of the other Asian markets experienced substantial growth in export value. Exports to China, South Korea, Taiwan and Hong Kong increased by more than 10% in each market between 1998 and 1999.

Japan, which imported $1.3 billion of goods from Alberta in 1999, was Alberta's largest Asian market and its second largest overall. China became the second largest Asian market and third largest overall, as Alberta imports increased by 12.6% to a value of $543.0 million. South Korea, Taiwan and Indonesia followed with imports of $500.5 million, $232.6 million and $107.0 million, respectively. Smaller Asian markets include Hong Kong ($96.8 million), Singapore ($57.8 million), Philippines ($41.7 million), Malaysia ($41.0 million), Bangladesh ($30.8 million) and Thailand ($21.6 million).

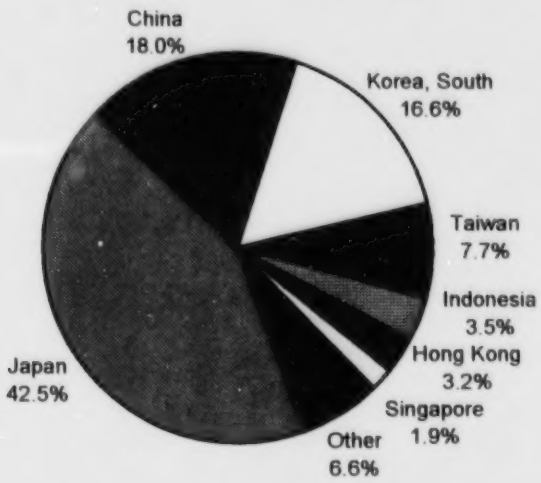
Alberta Exports to Asia, 1999



Total Value of Exports $3.0 Billion

Japan

Japan was Alberta's largest Asian export market in 1999 and was the second largest international market. Exports to Japan accounted for 42.5% of the total Asian market in 1999. The value of exports to Japan decreased by 4.7% from $1.4 billion in 1998 to $1.3 billion in 1999. Over that same period, Canada's exports to Japan fell 4.2%. Canada exported a total of $8.2 billion in 1999. Alberta's share of Canadian exports to Japan was 15.7%.

Since 1995, Alberta exports to Japan have fallen by 29.3%. Canadian exports to Japan have declined by 31.2% over the same period.

Coal continued to be Alberta's largest export to Japan, accounting for 22.5% of total exports. Despite a 9.7% increase in the volume of coal exported, the total value decreased by $20.0 million in 1999. The drop in coal prices was the cause of this decline. Coal, canola and chemical wood pulp collectively made up nearly half of the total export value.

Canola exports dropped 12.6% from $218.0 million in 1998 to $190.4 million in 1999, yet remained Alberta's second largest export to Japan. The quantity of canola exported increased slightly, therefore, the value was lost through the 13.5% drop in canola prices. Canola oil exports dropped 97.9% in 1999, resulting in the biggest loss in export value ($33.7 million). The decrease in canola oil resulted from the 97.6% drop in volume.

Chemical wood pulp, valued at $142.5 million, had the largest net gain in export value in 1999 ($26.6 million). The growth was a direct result of a 21.1% increase in volume. Equal growth in both volume and prices caused softwood lumber exports to increase 24.2% to $70.5 million. Cattle exports increased to $18.5 million in value despite a 10.2% drop in prices. Alberta increased the total quantity of cattle exported by 249.5% in 1999.

China

China was Alberta's second largest Asian market in 1999, and its third largest overall. Exports to China totaled $543.0 million, compared to $482.1 million in 1998, a 12.6% increase. The percentage growth in this market was second only to the U.S. among the ten largest export markets.

Alberta accounted for 21.9% of the $2.5 billion in Canadian exports to China. Between 1995 and 1999, Alberta exports to China fell 20.3%, compared to 24.7% for all of Canada.

Alberta's 1999 upsurge was due to large increases in exports of sulphur, ethylene glycol, polyethylene and non-coniferous chemical wood pulp. The collective growth of these commodities increased the total export value by $131.6 million.

Although exports of canola decreased by 14.2% in 1999 to $121.7 million, it remained Alberta's top export to China. This decline was price related. Exports of artificial filament tow (for cigarette filters) remained the second largest at $69.2 million, despite a 9.4% drop in value.

Exports of polyethylene rose 64.6% to $68.4 million, ethylene glycol jumped 159.9% to $63.9 million, and sulphur grew 291.0% to $60.6 million. Higher volumes and marginal price increases caused each of these exports to grow significantly.

South Korea

Alberta exports to South Korea increased by 12.4%, climbing to $500.4 million in 1999 from $445.3 million in 1998. Canada's exports to South Korea rose 7.8% from $1.8 billion in 1998 to $1.9 billion in 1999. Alberta accounted for 25.9% of Canadian exports to South Korea.

South Korea was Alberta's third largest Asian market and fourth largest overall. Between 1995 and 1999 Alberta exports to South Korea decreased by 6.4%, while total Canadian exports shrank by 28.5%.

The key elements to the 1999 growth included a 41.1% increase in non-coniferous chemical wood pulp, Alberta's largest export to South Korea, a 93.0% rise in ethylene glycol, and a tripling of exports of frozen beef. These three commodities made up 41.4% of all Alberta exports to South Korea.

Exports of non-coniferous chemical wood pulp increased from $102.3 million in 1998 to $144.4 million in 1999, a result of a 23.3% climb in price and 14.4% higher volumes. Coal was Alberta's second largest export to South Korea and rose 5.1% from $124.8 million in 1998 to $131.2 million in 1999. Higher volumes of ethylene glycol and frozen beef resulted in a net gain of $33.9 million export value.

Alberta's third largest export to South Korea was styrene, worth $54.2 million in 1999, down 14.4% from $63.3 million in 1998. This loss was entirely volume related. Lower prices and volumes led to the decline in exports of malt from $8.2 million in 1998 to $3.1 million in 1999. Exports of canola oil fell from $59.4 million in 1998 to $110,000 in 1999.

Taiwan

The value of Alberta's exports to Taiwan increased by 10.6%, from $210.3 million in 1998 to $232.6 million in 1999. Canada's exports to Taiwan fell 4.0% over the same period. Between 1995 and 1999 Alberta's exports to Taiwan declined by 14.6% while Canada's exports dropped by 36.6%.

Exports of ethylene glycol were 8.7% higher in 1999 than they were in 1998 and remained Alberta's top commodity exported to Taiwan. These exports increased from $59.2 in 1998 to $64.3 million in 1999. Exports of styrene increased 25.6%, from $24.0 million to $30.1 million. Telephone line equipment exports rose 175.5% from $4.2 million to $11.6 million. While growth in styrene was mostly price related, increases for ethylene glycol and telephone line equipment exports were both price and volume related.

Despite an increase in price, exports of bovine hides dropped 31.0% from $29.9 million in 1998 to $20.6 million in 1999 because of decreased volumes. Exports of polyethylene fell 40.2% from $10.3 million in 1998 to $6.2 million in 1999, mostly because of lower volumes.

Indonesia

Indonesia remained Alberta's fifth largest Asian export market despite a 31.0% drop in Alberta exports. Exports to Indonesia fell from $155.1 million in 1998 to $107.0 million in 1999. Canada's exports to Indonesia declined by 2.5% from $541.8 million in 1998 to $528.5 million in 1999. Alberta accounted for 20.2% of all Canadian exports to Indonesia. Between 1995 and 1999, Alberta exports to Indonesia have dropped 25.7% while Canadian exports have decreased 14.7% over the same period.

Wheat and ethylene glycol accounted for 61.1% of all Alberta exports and fell 41.1% and 37.6% respectively. Exports of wheat dropped from $74.2 million in 1998 to $43.7 million in 1999, while ethylene glycol decreased from $34.7 million in 1998 to $21.6 million in 1999. Lower volumes caused the declines in these two commodities.

Exports of polyethylene and chemical (non-coniferous) wood pulp more than doubled to $5.8 million and $4.4 million respectively. Significant drops in chemical (coniferous) wood pulp and semi-chemical wood pulp exports totaled $7.7 million.

Hong Kong

In 1999, Alberta exports to Hong Kong accounted for 3.2% of total exports to Asia and increased in value from $90.3 million in 1998 to $96.8 million in 1999. A 30.6% drop in Canadian exports contrasted the 7.3% growth in Alberta exports. Hong Kong's imports from Canada dropped from $1.3 billion in 1998 to $919.7 million the following year.

Hong Kong's imports of Alberta goods increased by 2.3% between 1995 and 1999, considerably better than the 33.4% drop at the Canadian level. Alberta accounted for 10.5% of Canadian exports to Hong Kong in 1999.

A large rise in volume made cobalt Alberta's second largest export to Hong Kong, increasing from $384,800 in 1998 to $10.5 million in 1999. Exports of telephone line equipment rose from $664,000 in 1998 to $6.9 million in 1999 while bovine hides grew from $2.3 million in 1998 to $8.2 million in 1999.

Exports of artificial filament flow remained Alberta's top export to Hong Kong despite a 30.4% drop from $28.4 million in 1998 to $19.7 million in 1999. Drops in prices and especially volume caused the negative growth. Lower volumes caused canola oil exports to fall from $22.6 million in 1998 to $83,100 in 1999.

Western Europe

The value of Alberta exports to Western Europe declined by 10.0% in 1999 to $966.6 million. This is the first time since 1994 that exports to this region have dipped below the $1.0 billion mark. The loss in export value was mainly the result of a significant decrease in exports to the United Kingdom. More specifically, a very large decline in exports of used aircraft, and decreases in the quantities of cobalt and chemical wood pulp exported caused the decline in Western Europe's imports.

Western Europe represented 2.8% of Alberta's international exports in 1999 and is Alberta's third largest export region.

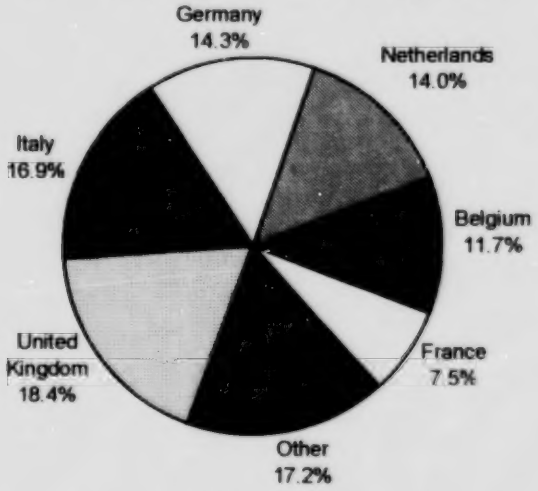
The United Kingdom remained Alberta's largest market in Western Europe with exports valued at $177.8 million in 1999. Italy remained the second largest market with exports of $163.0 million. Germany was Alberta's third largest Western Europe market ($138.5 million), followed by the Netherlands ($135.4 million), and Belgium ($113.2 million).

Alberta Exports to Western Europe, 1999



Total Value of Exports $967 million

United Kingdom

In 1999, the United Kingdom (UK) was Alberta's seventh largest overall market and maintained its status as the largest Western European market. However, exports to the UK decreased 22.9%, from $230.8 million in 1998 to $177.8 million in 1999, the largest decline of the top ten export markets. Reduced semi-chemical wood pulp and coal exports and the disappearance of exports of used aircraft, were the main causes.

In contrast, Canada's exports to the UK grew by 6.1%. Alberta's share of Canadian exports to the UK was 4.0%. Between 1995 and 1999, Alberta's exports to the UK declined by 14.4%, while Canada's exports rose 17.5%.

Alberta exports of used aircraft totaled $44.6 million in 1998, but this commodity was not exported in 1999. Coal, nickel and semi-chemical wood pulp dropped by 29.5%, 25.3% and 41.5% respectively in 1999. Slumping coal prices caused the loss in value for UK coal imports, while nickel and semi-chemical wood pulp decreases were volume related.

In 1999, few of Alberta's top exports to the UK showed strong growth. Exports of wheat rose 18.5% to $27.4 million, while exports of parts of telephone equipment increased 4.2% to $14.4 million, and exports of parts of telephone switching apparatus grew by 170.6% to $6.1 million.

Italy

Italy remained Alberta's second largest Western European market in 1999. However, the value of exports to Italy decreased 5.7%, from $172.9 million in 1998 to $163.0 million in 1999, because of declines in wheat and durum wheat exports. Italy's imports of Canadian goods fell by 7.5%. Alberta's share of Canadian exports to Italy was 11.8%.

Between 1995 and 1999, Alberta's exports to Italy grew by 0.1%, considerably better than Canada's decrease of 22.3%.

Nickel remained the leading export to Italy, accounting for 40.4% of Alberta exports. Nickel exports increased 11.6% to $65.8 million because of increased volumes and prices. Exports of semi-chemical wood pulp increased 44.1% to $29.8 million, mostly due to a rise in volume. The total value of wheat and durum wheat fell by $20.1 million. Wheat and durum wheat decreased by 48.3% and 50.5% respectively. Durum wheat exports fell due to decreased prices and volumes, whereas wheat declines were strictly volume related.

Germany

Exports to Germany dropped by 15.4%, from $163.8 million in 1998 to $138.5 million in 1999. This decrease can be attributed to large declines in exports of soya beans and heterocyclic compounds. Germany remained Alberta's third largest Western European market and ninth largest export market overall.

Canada's exports to Germany fell 11.5% in 1999. Alberta's share of Canadian exports to Germany was 6.2%. Between 1995 and 1999, Alberta's exports to Germany have decreased by 34.2%, while total exports from Canada decreased 29.1% over the same period.

Exports of soya beans, which totaled $12.9 million in 1998, were not exported in 1999. A second major loss was a 78.8% drop in exports of heterocyclic compounds, from $13.4 million to $2.8 million. Alberta's largest export was non-coniferous chemical wood pulp, despite dropping 12.0% from $30.7 million in 1998 to $27.0 million in 1999. Lower prices were the primary cause of the wood pulp decline. Exports of carbon fell 45.0%.

Semi-chemical wood pulp exports rose from $19.9 million in 1998 to $23.0 million in 1999 to become Germany's second largest import from Alberta. Coal exports, which were non-existent in 1998, totaled $11.6 million in 1999. Exports of artificial body parts rose from $10.3 million in 1998 to $14.9 million in 1999.

Netherlands

Dutch imports from Alberta dropped by 17.1%, from $163.5 million in 1998 to $135.4 million in 1999, mainly because of lower cobalt shipments. The Netherlands was Alberta's fourth largest Western European market and tenth largest overall. Canadian exports to the Netherlands were 17.8% lower in 1999 than the previous year. Alberta accounted for 9.3% of the Netherlands' imports from Canada. Between 1995 and 1999, Dutch imports from Alberta and Canada decreased by 7.7% and 9.4% respectively.

Exports of nickel and cobalt accounted for 73.5% of total exports to the Netherlands. Nickel exports increased 14.3% from $51.0 million in 1998 to $58.3 million in 1999. However, exports of cobalt dropped by 30.7% from $59.5 in 1998 to $41.3 million in 1999. Less nickel was exported to the Netherlands at a higher price, while more cobalt was exported at a much lower price.

Styrene was not exported to the Netherlands at all in 1998 but the following year the total export value of this commodity was $7.8 million. Exports of sinking machinery fell from $2.6 million in 1998 to $58,000 in 1999. Coniferous chemical wood pulp exports, worth $5.9 million in 1998, were not exported the following year.

Belgium

Alberta exports to Belgium increased 1.5% from $111.6 million in 1998 to $113.2 million in 1999. Increases in polyethylene and nickel were the major factors for the growth in 1999. Canadian exports to Belgium decreased by 7.6% in 1999, and fell 29.2% between 1995 and 1999. Alberta has decreased its Belgian exports by 34.4% over the same period.

Polyethylene became Belgium's top Alberta import growing 87.7% from $16.8 million in 1998 to $31.6 million in 1999. Exports of nickel jumped from $463,000 in 1998 up to $12.8 million in 1999. Increased volumes caused growth in both commodities. Exports of wheat also increased in value by $1.4 million or 37.0%.

Exports of coal, Alberta's third largest commodity, decreased by 37.7% to $14.9 million in 1999. A dive in volume and a minor drop in price caused the decline. Alberta exports of cobalt declined 59.3%, from $17.5 million in 1998 to $7.1 million in 1999. Semi-chemical wood pulp exports fell 54.0% to $2.5 million in 1999. Commodity prices for both cobalt and semi-chemical wood pulp increased, therefore the losses were due to lower volumes.

South America

South America became the fourth largest regional market for Alberta goods in 1999. Exports to this region dropped by 1.7%, from $355.0 million in 1998 to $348.9 million in 1999. Lower exports of wheat, durum wheat and sulphur more than offset higher coal exports. Brazil imported fewer Alberta goods for the third consecutive year. Since 1995, exports to South America have grown by 18.7%.

Brazil remained Alberta's largest market in the region, accounting for $101.1 million of Alberta's exports to South America. However, Brazilian imports from Alberta dropped 21.9% in 1999, and lost a large share of the South American market. Chile became the second largest market in South America, as Chilean imports from Alberta more than doubled to $70.3 million in 1999. Venezuela was the third largest South American market with Alberta imports of $62.4 million, a 21.6% increase from 1998. Argentina was the fifth largest market from South America, as Alberta imports totaled $29.4 million, which was a 49.7% increase from 1998.

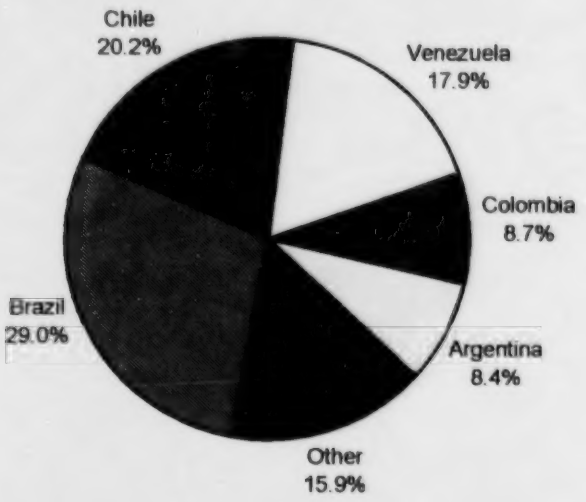
Alberta Exports to South America, 1999



Total Value of Exports $349 million

Brazil

Alberta exports to Brazil fell by 21.9% to $101.1 million in 1999, down from $129.6 million in 1998. This decline was the result of large declines for wheat, articles of iron and steel, and sulphur. Canada's exports to Brazil declined 34.3%. Alberta's share of Canadian exports to Brazil was 12.3% in 1999. Since 1995, Alberta exports to Brazil have declined by 35.7%, while Canadian exports fell by 35.6%.

The top two exports to Brazil, coal and sulphur, accounted for more than 60% of Alberta exports. Exports of sulphur fell by 28.2% in 1999 to $31.3 million, from $43.5 million in 1998, as volumes dropped by 25%. Alberta's coal exports to Brazil increased by 60.3% in 1999 and became the largest export to Brazil. Coal exports were valued at $20.0 million in 1998, and rose to $32.1 million in 1999 as volumes doubled.

Volumes of wheat exports plunged in 1999. As a result the commodity dropped 63.2%, from $26.4 million in 1998 to $9.7 million in 1999. Articles of iron and steel, exports of which totaled $12.5 million in 1998, were not exported in 1999. Other exports that dropped significantly included malt and chemical wood pulp.

Chile

Chilean imports from Alberta increased 119.1% from $32.1 million in 1998 to $70.3 million in 1999, making Chile the second largest South American market. A huge gain in coal exports to Chile was the primary cause of the growth. Canadian exports to Chile increased 5.5% up to $346.9 million in 1999. Alberta accounted for 20.3% of the Canadian total. Since 1995, Alberta exports have grown 62.0% while Canadian exports have declined 6.1% over the same period.

Coal became Alberta's top commodity in 1999, accounting for 53.7% of all exports to Chile. Exports of coal increased 378.8%, from $7.9 million in 1998 to $29.9 million in 1999. The 52.4% drop in coal prices was more than compensated by a nine-fold growth in volumes.

Durum wheat exports to Chile jumped 64.3% to $5.5 million, despite a 9.8% decrease in prices. Chilean imports of Alberta sulphur tripled to $3.0 million in 1999. Exports of control panels, worth $3.9 million, became Alberta's fourth largest export to Chile.

Venezuela

Alberta exports to Venezuela grew by 21.6% in 1999, from $51.3 million in 1998 to $62.4 million. Canadian exports were virtually unchanged. Alberta's five-year export growth was 189.3%. This was considerably higher than Canada's 14.2% increase.

Exports of wheat and durum wheat accounted for 72.6% of total exports to Venezuela. Higher volumes caused exports of wheat to increase by 30.9% to $32.1 million and durum wheat by 46.4% to $13.3 million. The top nine commodities exported to Venezuela all increased in value from 1998 to 1999 by 29% or more. Exports of hydraulic engines grew 173.2% to $1.9 million, of machinery with individual functions 38.4% to $1.6 million, of boring machinery 744.8% to $1.5 million, and of pumps 168.6% to $1.3 million.

Central America, Mexico and the Caribbean

In 1999, the value of exports to the Central American region declined 20.2%, making this region Alberta's fifth largest export market. Between 1998 and 1999, Alberta exports decreased from $415.8 million to $332.0 million.

This drop was mostly the result of lower export values for Mexico and Cuba due to reduced shipments of electronics and canola. These two countries made up 85.3% of Central America's total imports. Exports to Central America grew by 37.5% between 1995 and 1999.

The majority of Alberta's exports went to Mexico. That country imported 70.3% of Alberta's goods in this region. Cuba was Alberta's second largest Central American market at $49.9 million, followed by Guatemala and the Dominican Republic.

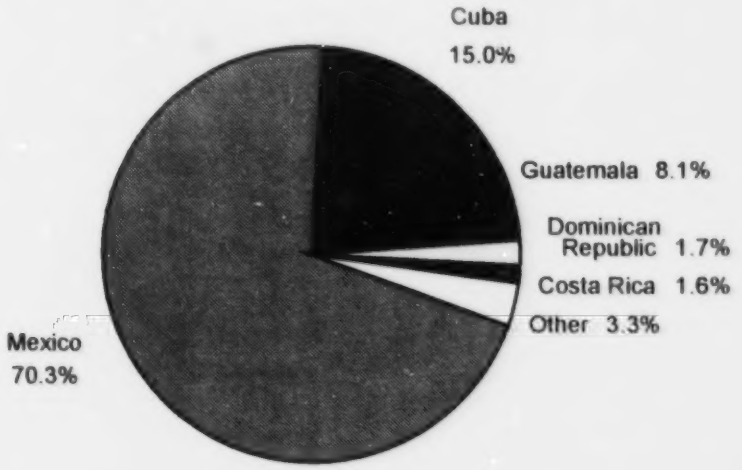
Alberta Exports to Central America, 1999



Total Value of Exports $332 million

Mexico

Alberta exports to Mexico decreased 18.6%, from $286.7 million in 1998 to $233.3 million in 1999. However, Mexico has maintained its position as Alberta's fifth largest export market among all countries, and remained the largest market in Central America. This was the first time in eight years that Mexico's imports from Alberta have experienced negative growth. A noticeable loss in canola exports was the major cause of this decline. Mexico's imports from Canada increased by 8.6%, from $1.4 billion in 1998 to $1.5 billion in 1999. Alberta's share of Canada's exports to Mexico in 1999 was 15.3%. From 1995 to 1999 the total growth in Alberta exports to Mexico was 32.4%, just short of Canada's 35.4% increase.

Exports of wheat, Mexico's top Alberta import, fell 5.7% in 1999, to $47.6 million. However, the largest change in exports to Mexico was canola, which dropped by 41.4% to $47.2 million. A mix of lower volumes, and to a lesser degree lower prices, caused canola exports to weaken. Exports of metal oxide semiconductors and telephone switching apparatus also collectively declined by $22.9 million in export value when they dropped to $990,000 and $521,000 respectively.

The value of Alberta's boneless beef exports to Mexico increased 567.3% to $31.4 million in 1999 because of an equal increase in volumes. Other significant gains were seen in sulphur, up 31.3% to $21.3 million, transmission apparatus, up 252.0% to $6.8 million, and milk powder, up 54.6% to $9.9 million.

Other major exports to Mexico included chemical wood pulp (up 29.2% to $11.2 million) barley (up 52.4% to $8.2 million), and parts of line telephone apparatus (down 39.5% to $7.4 million).

Cuba

Cuba's imports from Alberta decreased by 40.5% from $84.0 million in 1998 to $49.9 million in 1999, mainly because of lower exports of boring machinery and dried peas. Imports from Canada declined by 17.7% to $355.3 million. Alberta accounted for 14.1% of Canada's total exports to Cuba in 1999. From 1995 to 1999, Alberta exports to Cuba have increased by 51.9% while exports from Canada have increased by 37.0%.

Boring machinery exports, which totaled $11.9 million in 1998, declined to less than $5,000 in 1999. In 1999, a significant drop in price and volume caused a 53.7% decline in dried peas to $7.0 million. Parts of machinery with individual functions also dropped 89.0%, from $5.9 million in 1998 to less than $641,000 in 1999. Sulphur was virtually unchanged and became Alberta's leading export to Cuba at $14.9 million.

Wheat exports increased 66.5% to $6.5 million making it the third largest commodity. Exports of purifying machinery and heat exchange units, which were not exported in 1998, were valued at $1.4 million and $1.1 million respectively in 1999.

Guatemala

Alberta exports to Guatemala increased 8.5%, from $23.0 million in 1998 to $27.1 million in 1999. A major increase in exports of polyethylene was the primary cause of this growth. During the same year total Canadian exports to Guatemala jumped 19.0% to $165.0 million. Alberta's share of Canada's exports to Guatemala in 1999 was 16.4%. Since 1995, Guatemala imports from Canada quadrupled, while imports from Alberta rose twelve-fold.

A huge increase in volumes of polyethylene exported to Guatemala has caused a 775.3% value surge, from $257,000 in 1998 to $2.2 million in 1999. Exports of durum wheat increased 87.4% to $1.0 million in 1999, despite a 20.0% drop in price. Malt and oatmeal, which were not exported in 1998, were worth more than $1.1 million in 1999.

In 1999, wheat accounted for 80.1% of the total exports to Guatemala and was the largest export despite a slight drop in value. Exports of wheat decreased 5.6%, from $23.0 million in 1998 to $21.7 million in 1999, because of equal declines of volumes and price.

Middle East

The Middle East was Alberta's sixth largest regional market in 1999. Alberta exports to the region fell by 9.4%, from $305.0 million in 1998 to $276.3 in 1999, as a result of lower machinery exports. Iran remained the largest market in the Middle East as exports to the nation grew by 31.1%, the result of higher wheat volumes. Iran accounted for 39.5% of all exports to the Middle East. Between 1995 and 1999 exports to the region increased 42.4%.

The regional decline was mainly due to a $37.6 million drop in exports to the United Arab Emirates. In contrast to Iran, lower wheat exports to the United Arab Emirates caused the steep decline in export value. Exports to Israel, the third largest market, dropped from $27.7 million in 1998 to $16.2 million in 1999. Exports to Iraq, which were non-existent in 1998, were valued at $9.5 million in 1999. Other major Middle Eastern markets include Egypt, Sudan, Libya, Turkey and Saudi Arabia.

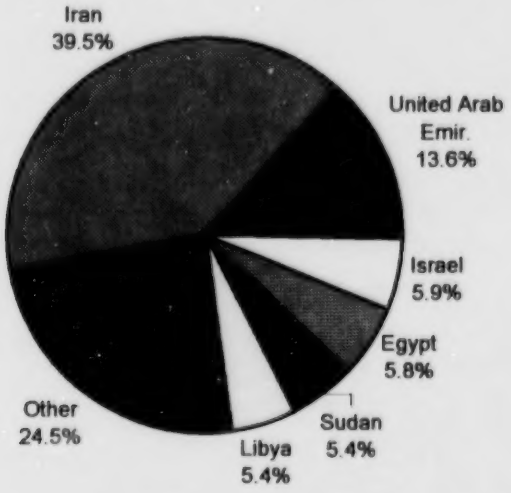
Alberta Exports to the Middle East, 1999



Total Value of Exports $276 million

Iran

Iran's share of the Middle Eastern market grew in 1999, accounting for 39.5% of the exports to the region. Alberta's exports increased 31.1% from $83.3 million in 1998 to $109.1 million in 1999. Alberta accounted for 20.3% of Canada's exports to Iran, which doubled in 1999 to $537.2 million. Since 1995, Alberta's exports to Iran have dropped 0.9% while Canada's exports to the nation have grown 25.1%.

The increase in Alberta exports to Iran in 1999 was the result of a 77.1% increase in wheat volumes. Wheat was the top commodity exported to Iran, accounting for 87.4% of the total export value. Iranian imports of Alberta wheat grew 63.9%, from $58.2 million in 1998 to $95.3 million in 1999, despite a minor drop in wheat prices. New exports of non-domestic dryers and laboratory machinery, which were not exported in 1998, were collectively worth $4.4 million the following year.

United Arab Emirates

The United Arab Emirates (UAE) were Alberta's second largest market in the Middle East in 1999, despite a 53.8% drop in exports that year. The loss halted a four-year trend of increasing Alberta exports to the UAE. Alberta exports fell from $69.9 million in 1998 to $37.5 million in 1999. Canadian exports to the UAE decreased by 47.9% in 1999. Alberta accounted for 21.9% of Canadian exports to the UAE. Since 1995 Alberta exports to the UAE have increased 114.5% in contrast to Canada's 23.5% decrease in exports over the same period.

Wheat exports to the UAE dropped 64.8%, from $49.4 million in 1998 to $17.4 million in 1999. Despite the huge loss, wheat sustained its position as the top commodity exported to the UAE. Alberta's wheat exports slid primarily because of a 64.0% decrease in volumes. Parts of hydraulic engines and parts of boring machinery collectively declined by $5.2 million in 1999. However, exports of boring machinery, telephone line apparatus, and machines with individual functions grew significantly in the same year.

Africa

Africa's imports of Alberta goods fell by 23.8%, from $285.4 million in 1998 to $217.6 million in 1999, mostly because of large declines in exports of wheat and durum wheat. Between 1995 and 1999 Alberta exports to the region declined by 11.5%.

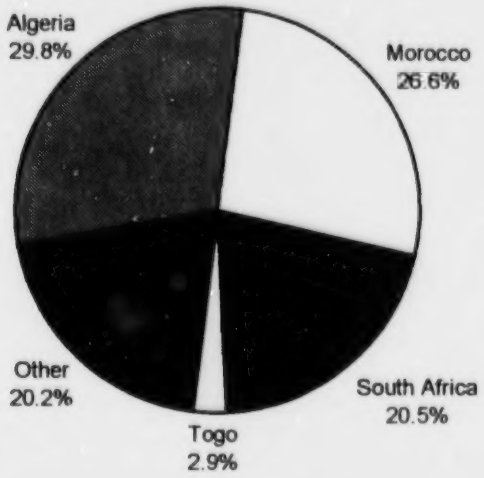
Each of the top three markets in Africa had significant declines in 1999. Algeria, Morocco and South Africa cut back on Alberta goods by 25.6%, 13.0% and 18.8%, respectively. These three nations accounted for 77.0% of the African market. Lower prices of durum wheat and lower volumes of wheat contributed to the decreases.

Algeria was Africa's top market despite a 25.6% drop in its Alberta imports in 1999. Exports to Algeria accounted for 29.8% of African imports from Alberta. Morocco and South Africa followed with exports of $58.0 million and $44.6 million, and represented 26.6% and 20.5% of Alberta exports to Africa.

Alberta Exports to Africa, 1999



Total Value of Exports $218 million

Algeria

Exports to Algeria fell 25.6%, from $87.2 million in 1998 to $64.9 million in 1999. Canadian exports to Algeria dropped 16.2% to $472.3 million in 1999. Alberta's share of Canadian exports to Algeria was 13.7%. Between 1995 and 1999 Alberta exports to Algeria have shrunk 19.0% while total Canadian exports have dropped 12.8%.

Durum wheat accounted for 95.5% of Alberta exports to Algeria. A 22.4% decrease in durum wheat exports in 1999 was the major cause of the overall export decline. Alberta's exports of durum wheat fell from $79.9 million in 1998 to $62.0 million in 1999, mostly because of falling prices. Prefabricated buildings and wheat, exports worth $3.3 million in 1998, were not exported in 1999. Exports of diesel/semi-diesel engines, parts of machines with individual functions, and parts of purifying and filtering machinery collectively totaled $1.3 million in 1999, up from $37,000 in 1998.

Morocco

Alberta exports to Morocco were 13.0% lower in 1999 than they were in 1998, falling from $66.6 million in 1998 to $58.0 million in 1999. Canadian exports to Morocco declined by 4.7% in 1999 and 4.6% between 1995 to 1999. Morocco's imports from Alberta have slipped 22.4% since 1995. Alberta accounted for 32.2% of the $179.8 million total Canadian exports to Morocco.

Sulphur exports accounted for 61.9% of Alberta's 1999 exports to Morocco, but dropped 11.6% from the year before. Exports of sulphur, worth $40.6 million in 1998, fell to $35.9 million in 1999. Canola was not exported in 1999 and accounted for $3.5 million of the $8.7 million export decline that year. Exports of wheat also fell 17.7% to $6.3 million.

Exports of durum wheat increased 3.4% to $14.5 million to become Alberta's second largest export to Morocco. Significant growth in durum wheat volumes more than offset the falling prices of the commodity in 1999

South Africa

South Africa was Alberta's third largest African market in 1999. Alberta exports to South Africa declined 18.8%, from $55.0 million in 1998 to $44.6 million the next year. Canadian exports decreased by 24.2% to $235.1 million. Alberta accounted for 19.0% of South African imports from Canada. Exports from Alberta rose 7.2% between 1995 and 1999, while Canadian exports dropped 27.4% over the same period.

Sulphur was the top Alberta export to South Africa, accounting for 59.4% of the total export value. A significant price hike caused exports of sulphur to increase 11.4%, from $23.8 million in 1998 to $26.5 million in 1999. Exports of wheat dropped 50.9% to 8.2 million, whiskies decreased 69.9% to under $1.0 million, and malt fell 25.8% to $5.0 million. The losses sustained by these three commodities reduced Alberta's exports to South Africa by $12.1 million in 1999.

Oceania

Oceania consists of Australia, New Zealand and other South Pacific countries. Oceania was the only region, with the exception of the U.S., that increased its imports from Alberta. Exports to Oceania increased 12.6%, from $114.8 million in 1998 to $129.3 million in 1999. The growth was mainly due to a 25.8% increase in exports to Australia. Australia remained Oceania's largest export market in 1999 with exports valued at $91.6 million. The second biggest market for Alberta goods in this region was New Zealand. Alberta exports to New Zealand decreased 17.6% to $34.5 million in 1999. Exports of polyethylene decreased significantly in both Australia and New Zealand.

Alberta Exports to Oceania, 1999

Total Value of Exports $129 million

Australia

Australia was Oceania's largest market in 1999, accounting for 70.9% of the total exports to the region. Exports to Australia increased 25.8%, from $72.8 million in 1998 to $91.6 million in 1999, as each of the top seven Alberta exports to Australia increased in value. In contrast, Canadian exports dropped 3.8% to $914.8 million. Alberta exports accounted for 10.0% of the Canadian total. From 1995 to 1999 Alberta exports to Australia have fallen 28.1% while exports from Canada have slipped 20.6% over the five-year period.

Parts of telephone equipment became the top export to Australia with a 74.9% increase, up to $11.3 million in 1999, as volumes rose. Higher volumes also caused ethylene polymer exports to grow from $1.1 million in 1998 to $9.3 million in 1999, to become the second largest Alberta export to Australia. Sulphur exports grew 9.4% to $8.6 million, telephone line equipment exports nearly tripled to $7.4 million, and urea exports were up 36.6% to $6.5 million. New exports of peas, a commodity not exported in 1998, totaled $4.9 million in 1999.

In 1998, polyethylene was the top Alberta export to Australia but a severe drop in volume caused the exports to lose $15.0 million in value in 1999, from $15.6 million in 1998 to $582,000 in 1999.

New Zealand

Alberta exports to New Zealand declined 17.6%, from $41.9 million in 1998 to $34.5 million in 1999. The primary cause of this decline was a $21.6 million loss in exports of petroleum oils, which were not exported in 1999. Without this major loss New Zealand would have increased its overall value of Alberta imports. Canadian exports to New Zealand dropped 4.9% to $195.9 million. Alberta's share of total exports to New Zealand from Canada was 17.6%.

Between 1995 and 1999, Alberta exports have increased 8.3% in contrast to Canadian exports to New Zealand, which have dropped 7.5% over the same time.

The loss of petroleum oil exports in 1999 overshadowed substantial growth among other exports in the New Zealand market. Sulphur became the top export, and grew 146.7%, from $2.8 million in 1998 to $7.0 million in 1999. The gain in sulphur exports was mostly volume related, although sulphur prices were also higher. Major increases in ethylene polymer volumes caused the export to grow 833.0% to $3.7 million in 1999. New exports of helicopters, which were not exported to New Zealand in 1998, were worth $4.0 million the following year. Exports of polyethylene fell 76.5%, from $4.9 million in 1998 to $1.1 million in 1999.

Eastern Europe

Eastern Europe is Alberta's smallest regional export market. Alberta's exports to this region dropped 38.9%, the largest negative change of all regions, as a result of a large drop in machinery exports. Alberta exports to Eastern Europe were worth $89.6 million in 1998 but slumped to $54.8 million in 1999. Russia and Poland were the top two Eastern Europe markets accounting for 60.6% of all exports to the region. Alberta exports to Russia dropped 24.5% to $26.0 million while exports to Poland fell 74.7% to $7.2 million.

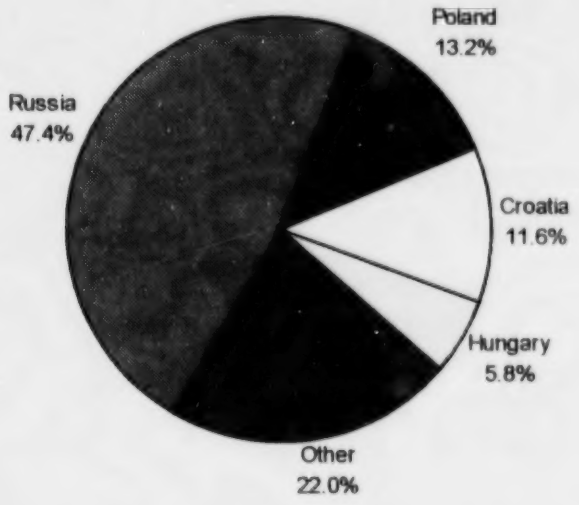
Alberta Exports to Eastern Europe, 1999



Total Value of Exports $55 million

Russia

In 1999, Alberta exports to Russia totaled $26.0 million. Compared to the 1998 value of $34.4 million, this represented a decline of 24.5%. 1999 was the third consecutive year that exports to Russia have dropped. However, it is still the largest market in Eastern Europe, accounting for 47.4% of exports to the region. Canadian exports to Russia fell 39.9% to $166.0 million in 1999. Alberta's share of Canadian exports was 15.7%.From 1995 to 1999 exports to Russia from Alberta have grown 11.4%, while Canadian exports have decreased by 12.8%.

The biggest decrease in 1999 was a $4.9 million drop in exports of units for automatic processing machines, which were not exported that year. Parts of machines with individual functions fell 72.7%, from $5.7 million in 1998 to $1.6 million in 1999. Exports of filtering machinery dropped 89.7%, from $2.2 million to $230,000. Parts of lifting and handling machine exports fell 46.4%, from $2.9 million to $1.5 million.

The largest export to Russia was parts of machinery involving a change in temperature, not exported in 1998, but worth $5.1 million in 1999. Parts of pumps rose from $83,000 to $2.1 million. Exports of taps and valves grew by 49.6% to $3.1 million in 1999.

Poland

Alberta's exports to Poland decreased by 74.7%, from $28.5 million in 1998 to $7.2 million in 1999. Total exports from Canada declined by 21.5% to $144.9 million the same year. Alberta exports accounted for 5.0% of the Canadian total. Between 1995 and 1999, Alberta's exports to Poland grew by 13.5%, while Canada's exports increased by one quarter over the same period.

The largest export to Poland in 1998, parts of machinery involving a change in temperature, fell from $20.3 million in 1998 to $378,000 in 1999. Canola exports was not exported in 1999 and lost $1.3 million as a result. Exports of heat exchange units dropped 96.8%, from $1.0 million to $32,000.

Durum wheat became the top export with a growth of 14.7% up to $2.5 million. This was the largest value increase among all commodities. Frozen beef cuts jumped 358.5% to become the third largest export to Poland.

Croatia

Alberta's exports to Croatia grew by 2,522.8%, from a mere $251,000 in 1998 to $6.3 million in 1999. Croatia became the third largest Eastern European market with the introduction of several new commodities imported from Alberta. Canadian exports increased 417.3% up to $51.8 million. Alberta made up 12.2% of total Canadian exports to Croatia. Between 1995 and 1999 exports from Canada grew 225.6%. Alberta did not export to Croatia in 1995.

Alberta only exported eight commodities to Croatia in 1999 but seven of them were not exported at all the year before. New exports of air/gas compressors worth $3.5 million accounted for 54.5% of all Alberta exports to Croatia. Valued at $1.8 million, exports of machines with individual functions made up 28.3% of total exports and were the second largest commodity. The other six commodities were collectively valued at $1.0 million.
